

Morse CH2200/2300 controls

Morse®

*(dual-function control
— each lever controls
throttle AND shift)*

Considered the best by boat builders, these controls feature superior styling, a compact design, positive lockout and smoothest feel available — and they're standard equipment on ski and jet boats. The ski boat unit includes superior neutral warm-up action, while the jet boat version features a waterproof start-in-gear switch.

(accepts these cables:)

OEM/Univ. 3300/33C Types

Universal 3300/33C Types

*Any Jet Throttle or Gate
Cable with 10-32 threaded
connection at control*

Applications:

Ski version: inboard ski boats and other single station craft requiring super-smooth, precise throttle control.

Jet version: jet boats powered by Mercury® Sport Jet 90 & early 120, OMC® Turbo Jet, or similar propulsion systems.

Single lever, dual action design controls both throttle and shift with one lever using 3300/33C type cables.

Features:

- Single lever, dual action for throttle & shift.
- Superior neutral engine warm-up control (ski version).
- Flush mount design for quick, tidy installation.
- Includes hardware for two 3300/33C type cables.
- Crisp shifting ball grip for a solid, sure feel.
- Neutral safety switches:
 - Optional for ski version;
 - Waterproof type included with jet version.
- Weatherproof exterior, rugged diecast frame.
- Meets/exceeds all applicable industry standards.

NOTE: When properly installed, these engine controls will connect to outboard, stern drive and inboard engines, utilizing universal 3300/33C type cables and engine connection kits. (These controls are not designed to use Mercury/Mariner® and OMC® OEM type control cables that have “eye” terminals at the control end of the cable.) Not for Berkeley, Sport Jet 175 or other applications using 4300/43 type cables. For those applications, see the MV-3 control pages, after these.

(May require purchase of cable connection kit(s) to complete control system installation.)

mechanical control, most ski boat and jet applications
